

Prakhar Chaturvedi

Full-Stack Software Engineer

jwellprakhar@gmail.com | +91 9997864231 | Ghaziabad, India

LinkedIn | GitHub | CodeChef

PROFESSIONAL SUMMARY

Full-stack software engineer with a B.Tech in Computer Science and Engineering, comfortable across the stack: Java, Python, JavaScript/TypeScript, and Node.js on the backend, React on the frontend, and hands-on experience deploying on AWS, containerizing with Docker, and automating delivery with GitHub Actions CI/CD. Built and shipped FinSight, a solo full-stack personal finance analytics platform, alongside production feature work on a live customer-facing web platform. Solved 400+ DSA problems across LeetCode and CodeChef (LeetCode Knight, 3-Star CodeChef).

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, Node.js, SQL, HTML, CSS

Backend: Spring Boot, Spring MVC, Express.js, FastAPI, REST APIs, JDBC, SQLAlchemy, WebSockets

Frontend: React.js, Thymeleaf, Bootstrap, Responsive UI

Cloud & DevOps: AWS (EC2, S3), Docker, GitHub Actions (CI/CD), Render, Supabase

Database: MySQL, PostgreSQL (Schema Design, Indexing, Query Optimization)

AI-Assisted Development: Cursor, Claude, GPT

Tools: Git, GitHub, Maven, npm, Postman, VS Code, IntelliJ IDEA

Concepts: OOP, SOLID, Data Structures & Algorithms, DBMS, MVC

PROFESSIONAL EXPERIENCE

Sahir Web Solutions

2026 – Present

Web Development Intern

Chandigarh

- Developed and tested customer-facing web features for kigo.ca, a live real estate platform serving property buyers, sellers, and agents across Canada, and contributed to development and testing of the company's internal CRM product.
- Deployed and hosted application components using AWS (EC2, S3), and used Docker to standardize local development environments across the team.
- Built and maintained CI/CD pipelines with GitHub Actions to automate testing and deployment across release cycles, contributing to 3+ full-stack modules end-to-end.
- Implemented property search and filter functionality across 500+ live listings, cutting average response time by an estimated 25%, using AI-assisted engineering workflows (Cursor, Claude, GPT) to accelerate development and debugging.

Internz Valley

May 2025 – Jul 2025

Java Development Intern

Remote

- Built foundational skills in modular, interface-driven Java design and SOLID principles under senior engineer guidance, practicing structured exception handling and debugging on sample service classes.

PROJECTS

FinSight – Full-Stack Personal Finance Analytics Platform

2026

React, TypeScript, FastAPI, Python, PostgreSQL, SQLAlchemy, Supabase, Render

Live Demo

- Built a full-stack personal finance platform enabling account creation and secure bank statement import for automated transaction analysis, including a native HDFC Bank .xls statement parser.
- Implemented a deterministic transaction categorization engine and a financial risk/anomaly scoring system evaluating spending behavior, recurring-payment changes, and cash-flow burn.
- Designed REST APIs with session-based authentication (HTTP-only cookies) and user-specific data isolation; deployed via Render + Supabase PostgreSQL with 20/20 backend tests passing.

Smart Expense Tracker

Jun 2025 – Aug 2025

Java, Spring Boot, Hibernate, MySQL, React.js, REST APIs

- Built a RESTful backend with Spring Boot and Hibernate, implementing JWT authentication and role-based access control across a layered Controller–Service–Repository architecture.
- Designed a MySQL schema with indexed queries, and added centralized exception handling, input validation, and standardized API responses across all endpoints.

EDUCATION

Ajay Kumar Garg Engineering College, Ghaziabad

2022 – 2026

B.Tech, Computer Science and Engineering

St. Thomas Sr. Sec. School, Mainpuri

2021 – 2022

Class XII (ISC)

ACHIEVEMENTS

Solved 400+ Data Structures & Algorithms problems across LeetCode, CodeChef, and other competitive platforms; earned LeetCode Knight Badge and 3-Star CodeChef Rating.
